Market Review

U.S. equities charged sharply higher across the board during January, boosted by record consumer and business confidence numbers. By late January, however, volatility had resurfaced and the S&P 500 Index suffered its first correction since early 2016. Tariff and trade war jawboning have led to continued volatility and pressure on the market as we closed the first quarter with modest losses on most headline U.S. equity indexes.

Size/Style

- Within the R2500, small-caps rallied modestly in March, pulling them to a slight performance advantage over mid-caps for all of Q1.
- From a style perspective, growth topped value in both mid-caps and small-caps - but this direction also turned during March, with value outpacing growth increasingly as the month progressed.

Russell 2500 Sectors

Relative sector performance among smid-caps was topsy-turvy when compared to Q4 2017:

- Energy and Materials, the two best-performing sectors during Q4 2017, were the two worst-performing sectors during Q1.
- Utilities continued their poor Q4 performance in the face of rising interest rates.
- By contrast, the Health Care and Tech sectors rebounded from a fairly weak Q4 performance to rank first and second during Q1, respectively.

Market Outlook

Recent market volatility brought us our first correction in a couple of years, and has curbed some of the excess valuation (and optimism) from U.S. equity markets. The economy remains quite solid; confidence is very high, small businesses are bullish due in large part to the regulation tide moving out, and excess inflation is largely absent. The Fed is of course now practicing QT (Quantitative Tightening) as well as now having bumped the Federal Funds Rate six times. We're in late innings, but the economy itself is not flashing any red lights.

The SMidCap portfolio currently favors mid-cap growth over small-cap value, and has an emphasis on strong share price momentum and high earnings yield (low P/E), while tilting against companies with high volatility, high leverage, and highly variable earnings. Technology (Computer Software) and Industrial (Industrial Parts) sectors are in favor, while Health Care (Biotech) and Energy (Energy Reserves) sectors are most out of favor.

Great Lakes Advisors, LLC ("Great Lakes" or "GLA") is an investment advisor registered with the Securities and Exchange Commission under the Investment Advisors Act of 1940. Established in 1981, Great Lakes is a subsidiary of Wintrust Financial Corporation and a part of the Wintrust Wealth Management family of companies. On October 1, 2013, majority owned subsidiary Advanced Investment Partners, LLC ("AIP") became fully-owned and integrated into Great Lakes. Great Lakes is a distinct business unit with distinct investment processes and procedures relating to the management and/or trading of investment portfolios for its clients.

Great Lakes Advisors, LLC claims compliance with the Global Investment Performance Standards (GIPS®). A complete list of firm composites and performance results, and the policies for valuing portfolios, calculating performance, and preparing GIPS compliant presentations are available upon request. Great Lakes Advisors, LLC's fees are available upon request and may be found in our Form ADV Part 2A. Performance data quoted herein represents past performance. Past performance does not guarantee or indicate future results. Returns and net asset value will fluctuate.

Manager commentary represents an assessment of the market environment at a specific point in time and is not intended to be a forecast of future events, or a guarantee of future results. This information should not be relied upon by the reader as research or investment advice. To determine if this strategy is appropriate for you, carefully consider the investment objectives, risk factors, and expenses before investing. The holdings, industry sectors, and asset allocation are presented to illustrate examples of the securities bought and the diversity of areas in which we may invest, and may not be representative of current or future investments. Portfolio holdings subject to change and should not be considered investment advice.
